The 2010 Inc. 5000, unveiled today on Inc.com, serves as a unique illustration of the profound changes taking place in the U.S. economy. The Government Services sector showed the biggest gain in terms of the number of companies on the list, up 33 percent from last year to 335 companies. Government Services was also the second-fastest-growing sector in terms of median revenue growth, posting a 202 percent gain over the 2006-2009 measuring period. More than half of these companies are based in Maryland, Virginia, and Washington, D.C. The fastest-growing sector by median revenue growth was Real Estate, now just a tiny group of 38 young, small companies, which showed 231 percent median growth over the period. (There were 121 Real Estate firms on the inaugural Inc. 5000 in 2007.) Business Products & Services is the top industry by number of companies on the list (640) and total revenue (\$80.7 billion), while Health is the biggest by total employment (287,726 jobs).

Despite the fact that most of this year's measuring period of 2006-2009 took place during the latest recession, aggregate revenue among the companies on the list actually increased to \$321.6 billion, up more than 50 percent from last year. The effects of the recession are seen, however, in the median three-year growth rate, which dropped to 96 percent from last year's 126 percent. This year's Inc. 5000 employ a record 1.4 million people, up from one million on last year's list. With unemployment remaining stubbornly high, policymakers and business leaders will do well to look to the Inc. 5000 companies for fresh ideas on achieving growth and creating jobs.
