Job Title: SAP ABAP Development Consultant

Job Description:

SAP Application Development oversight for a Long Term Federal Contract. Will oversee the business analysis, design, development and testing of custom applications (RICEF) for an SAP ERP 2005 implementation.

Job Duties and Responsibilities:

- * Reports into the Technical IPT Lead of the Program for guidance and direction.
- * Works with the client to support all aspects of the business analysis and design of custom development requirements for the SAP solution including Reports, Interfaces, Conversions, Enhancements (including workflow) and Forms (RICEF).
- * Interprets functional requirements and supports the development of Functional and Technical Development Specifications for SAP custom objects.
- * Develops SAP ABAP custom code in support of Functional and Technical specifications. Monitors the design, development, and exposure of SAP BAPI objects as necessary.
- * Reviews all SAP component and assembly testing required and documentation of the results of all testing in accordance with Program procedures and standards.
- * Supports quality reviews with IV&V and other external testing agencies of all SAP custom code design, development and testing efforts.
- * Oversees the migration of all SAP custom development through the system landscape in accordance with Program procedures and guidelines.
- * Adheres to the programming standards, naming conventions, and policies as outlined by the Program.

Other Job Requirements:

- * Knowledge of:
 - ** business requirements analysis;
 - ** SAP ABAP/4 development tools such as ABAP Dictionary, ABAP Editor, Area Menus, SAP Script, Function Builder, Transactions, and Business Object Builder;
 - ** SAP programming technologies (Batch Data, RFC, event scheduling, security authorization concepts, use of the SAP Data Dictionary Information System, object orientated coding, SAP On-line programming
- * Knowledge of Packaged Software Implementation methodologies such as Ascendant-SDLC, ADM, Fusion, or ASAP for business Systems development, design, and code.

- * Strong experience with SAP R/3 (3 year minimum) with SAP release 4.6 or above.
- * Experience with Business Warehouse (BW), Enterprise Portal (EP) and Information Exchange (XI) a plus
- * General knowledge of client server systems architecture and data modeling experience are a plus.
- * Public Sector experience is a plus.
- * Ability to work effectively in a multi-disciplinary team.
- * Excellent communication and inter-personal skills.

** This position is in support of the US Dept of Defense and pursuant to contractual obligation, US CITIZENSHIP is REQUIRED.
